

## The All-Natural Way to Relax During Your Dental Visit

### Introducing NuCalm®

We are constantly looking for ways to improve your dental experience and want to make sure that your time with us is as relaxing, comfortable, and productive as possible. That is why we are proud to introduce the latest and most effective deep relaxation therapy called NuCalm®. NuCalm not only provides you with a deep relaxation experience during your appointment, but also leaves you feeling both refreshed and rejuvenated after the appointment.

### What is NuCalm?

NuCalm is a patented all-natural stress intervention technology. NuCalm scientifically sequences four relaxation therapies to mimic your body's own process for 'winding down' and preparing for sleep. You will feel the same way you feel just as you are about to fall asleep.

### How Does NuCalm Work?

Deep relaxation is achieved through 4 simple steps. NuCalm is administered by our dental team at the beginning of your appointment and takes just a few minutes to apply. While listening to soothing music, you will relax comfortably in the chair for the entire appointment.

**Step 1:** All-natural dietary supplements containing a proprietary formulation of amino acids. The dietary supplements will NOT counteract or interfere with any medications or dietary restrictions.

**Step 2:** FDA-cleared micro-current stimulation. Research shows this helps facilitate the relaxation response.

**Step 3:** Soothing music presented through headphones. Layered in the music is proprietary neuroacoustic software designed to guide you to deep relaxation.

**Step 4:** Light-blocking eye mask or glasses to block visual stimulation and help maintain relaxation.

**We think you deserve the best. Experience NuCalm today and find out what over 400,000 dental patients across five continents already know.**

### 4 Simple Steps

1. Chew all-natural dietary supplements to help counteract adrenaline
2. Use micro-current stimulation to help begin relaxation
3. Listen to neuroacoustic software to create deep relaxation
4. Block out light to maintain deep relaxation

### What patients are saying

*"I loved NuCalm!! I am always an anxious patient and I can't wait for my family to try it" – Donna L.*

*"I will never worry again about my dental appointment. I lost sleep last night over this appointment. Thank you for being such a great dental office to find NuCalm for me." – Amanda R.*

*"I can't believe that was 90 minutes - only felt like it was 30 minutes tops!" – Craig B.*

*"NuCalm is very good. I have never relaxed while getting dental work!" – Bernadette S.*

**NOTE:** Some NuCalm components should not be used on individuals with implanted pacemakers, ventricular assist devices, brain implanted devices, or women who are pregnant or nursing. Please consult with a team member prior to use.
